

KEY FUNCTIONS

DATA VALIDATION

Perform reliable evaluation of validation rules and reduce manual corrections.

MULTIPLE FRAMEWORKS SUPPORT

Manage different taxonomies using one tool.

IMPORT AND EXPORT

Support for multiple formats such as XBRL, DPL, CSV, Excel.

INTUITIVE INTERFACE

Compare and edit data in views resembling reporting templates published by supervisors.

DESKTOP APPLICATION

Keep your reports secure: all data resides in your environment.

SHORT TIME-TO-MARKET

Prepare for reporting in advance with new requirements available in few days only.

ABOUT THE COMPANY

For over 15 years BR-AG has been collaborating with financial regulators, central banks, business registers, experts and other market participants in the endeavour to boost digitisation in the financial services sector across the world.

Driven by knowledge and experience, we have created ATOME: Particles - tailored to users' needs and responding to regulatory requirements.

OVERVIEW

ATOME: Particles is an intuitive, easy to use software designed to create, validate, import and export financial reports from/to Excel and XBRL formats. It supports multiple reporting frameworks, adds a reliable layer of quality assurance to submissions, running quality checks against proven and tested validation rules to detect and correct errors. Easily adopt regulatory updates into reporting with the latest taxonomy version readily accessible.

DESIGNED FOR

FINANCIAL INSTITUTIONS

To meet various regulatory reporting requirements in different sectors: insurance, banking, investment firms and pension funds.

SOFTWARE VENDORS

To strengthen services offering and support customers in a comprehensive way.

FINANCIAL AUTHORITIES

To optimise reports collection and verification processes.

CONSULTING COMPANIES

To run quality assurance checks and meet regulatory reporting requirements for the clients.

VALUE

COST-EFFECTIVE SOLUTION

for regulatory compliance
