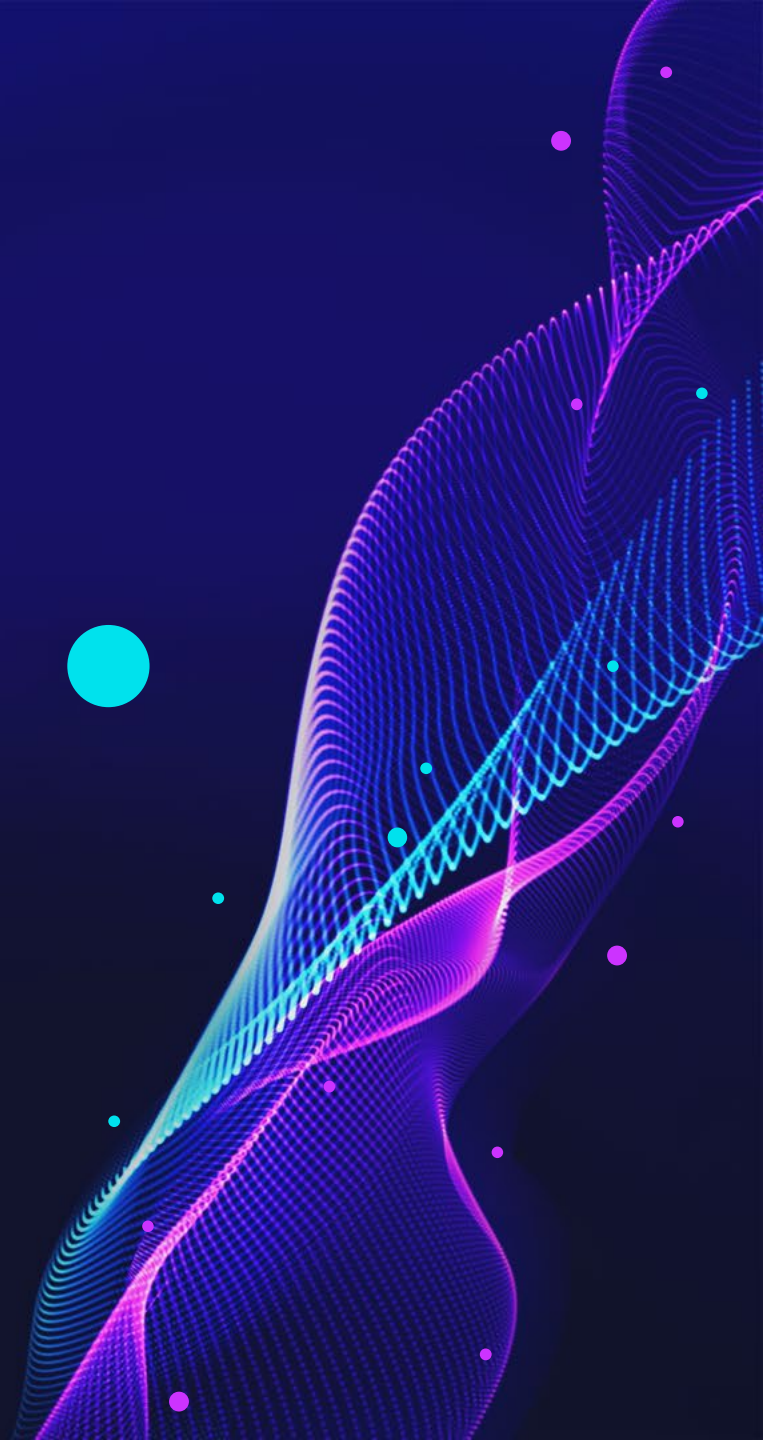
BRAG

SupTech Reimagined

Putting data understanding first.
Bridging business and tech needs.



SOLVING THE PROBLEM AND MAXIMISING THE VALUE

BRAG

New supervisory needs and regulatory changes affect data collection & processing each year.

Just in the EU banking sector, there are three new frameworks for banks to introduce more than **3 000 new validation rules.**

ATOME POWERS DATA-DRIVEN CHANGE MANAGEMENT

More data and checks mean more insightful supervision and **data-driven decision-making**. Automized processes bring an ‘intelligence’ component to the whole change management, making it less time- and effort-consuming.

Explore how ATOME makes it happen →

REGULATORY CHANGE MANAGEMENT REIMAGINED

ATOME

Different data

Insurance, Banking, Pension Funds, Investment Firms

Financial and Non-Financial Data

ATOME Matter

ATOME Particles

ATOME Vortex

Processed, meaningful, harmonious and organised data

Clear communication of changes for better compliance and less burden

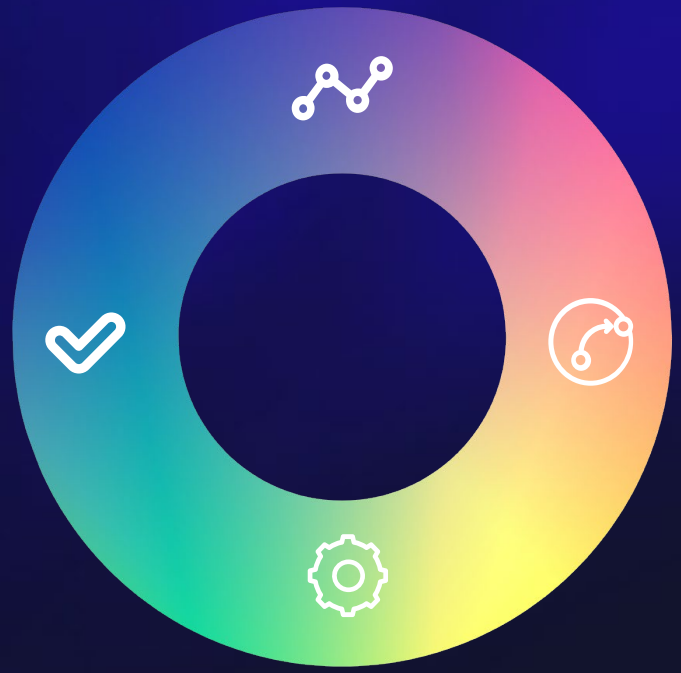
Maximise the power of standard:

supervisory data modelling (Data Point Model) and digital reporting (XBRL)

OUR VALUE PROPOSITION
FOR REG-DATA MANAGEMENT & SYSTEMS

Data Understanding by Design
- Automated Data Collection
- Integration of Data from Disparate Sources
- Standardised Data Design
- Regulatory Change Management
- Data Consultation & Collaboration

Business Intelligence
- Regulatory data analysis
- Data Visualisation
- Granular Data Analytics
- Use of XBRL Data



Data Quality
- Quality checks & Business Rules
- Data Validation
- Regulatory Reporting
- Compliance Management

Data Collection & Reporting
- Data collection
- Management of Regulatory Reporting
- Reporting Schedules

ATOME PLATFORM CLOSE LOOK

NCAs/NCBs

Reporters

Matter
- Metadata definition & versioning

Particles
- Validation rules validation
- Data input
- Data validation

Vortex
- Scheduling
- Data collection

Third Party apps
- Business rules processors
- Data gathering

Third Party apps
- Power BI
- Tableau
- etc.

ATOME

Know your data. Build trust

- Make interoperable, analyse
- Collect, validate, make accessible
- Standardise & prove
- Trace, map & link to source
- Identify & classify
- Understand
